# System of Care

## Youth & Family Driven

Valuing and ensuring that youth and families are full partners in all aspects of service delivery and have a primary decision-making role in their care.

## Community-Based

We see the home, school, and neighborhood of the family from an asset perspective and identify natural supports as a strengths-based approach.

## Trauma-Informed

Actively resist re-traumatization by recognizing the potential presence of trauma symptoms and the role that trauma may play in an individual's life.

## Culturally & Linguistically Responsive

We seek to meet families where they are and value diversity and develop services and supports to meet the unique needs of the community.
